Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830 - United Kingdom (UK)

## **SAFETY DATA SHEET**

TC 65PA X White 337/2

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

**1.1 Product identifier** 

| Product name | : TC 65PA X White 337/2 |
|--------------|-------------------------|
| Product code | : G1001300              |
| Product type | : Liquid.               |

1.2 Relevant identified uses of the substance or mixture and uses advised against

#### 1.3 Details of the supplier of the safety data sheet

Scott Bader Co Ltd, Wollaston. Northants NN297RL United Kingdom +44 (0)1933663100

e-mail address of person : SDS@scottbader.com responsible for this SDS

#### 1.4 Emergency telephone number

| <u>Supplier</u>                          |                             |
|--|-----------------------------|
| Telephone number<br>(Hours of operation) | : +44 (0) 1933 663399 (24h) |

## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition

: Mixture

## Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Acute Tox. 4, H332 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Repr. 2, H361d (Unborn child) STOT RE 1, H372 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

#### Classification according to Directive 1999/45/EC [DPD]

 

 The product is classified as dangerous according to Directive 1999/45/EC and its amendments.

 Classification
 : R10 Repr. Cat. 3; R63 Xn; R20, R48/20 Xi; R36/38

 Physical/chemical hazards
 : Flammable.

 Human health hazards
 : Possible risk of harm to the unborn child. Harmful by inhalation. Harmful: danger of serious damage to health by prolonged exposure through inhalation. Irritating to eyes and skin.

See Section 16 for the full text of the R phrases or H statements declared above. See Section 11 for more detailed information on health effects and symptoms.

| Date of issue/Date of revision         : 01/06/2016         Date of previous issue | : 01/06/2016 | Version : 1.07 1/15 |
|--|--------------|---------------------|
|--|--------------|---------------------|

## **SECTION 2: Hazards identification**

|   | Danger<br>H226 - Flammable liquid and vapour.<br>H332 - Harmful if inhaled.<br>H319 - Causes serious eye irritation.   |
|---|--|
|   | H226 - Flammable liquid and vapour.<br>H332 - Harmful if inhaled.  |
| : | H332 - Harmful if inhaled.   |
|   | <ul> <li>H315 - Causes skin irritation.</li> <li>H361d - Suspected of damaging the unborn child.</li> <li>H372 - Causes damage to organs through prolonged or repeated exposure.</li> </ul>  |
|   |  |
| : | <ul> <li>P201 - Obtain special instructions before use.</li> <li>P280 - Wear protective gloves. Wear eye or face protection. Wear protective clothing.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P241 - Use explosion-proof electrical, ventilating, lighting and all material-handling equipment.</li> <li>P260 - Do not breathe vapour.</li> </ul> |
| : | P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing.<br>P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.  |
| : | P235 - Keep cool.  |
| : | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| 1 | styrene  |
| 1 | Contains cobalt bis(2-ethylhexanoate). May produce an allergic reaction.   |
| : | Not applicable.  |
|   |  |

#### 2.3 Other hazards

Other hazards which do : None known. not result in classification

## **SECTION 3: Composition/information on ingredients**

|                            |   |              | <b>Classification</b>                                     |  |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                   | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |
|-------------------------------|---|
| Inhalation                    | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If it is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. If not breathing, if breathing is irregular<br>or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give mouth-to-mouth<br>resuscitation. Get medical attention. If necessary, call a poison center or physician.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband.                                   |
| Skin contact                  | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                     | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention. Never give anything by mouth to an unconscious person. If unconscious,<br>place in recovery position and get medical attention immediately. Maintain an open<br>airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Protection of first-aiders    | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.  |
|                               | ns and effects, both acute and delayed  |
| Potential acute health effect |   |
| Eye contact                   | : Causes serious eye irritation.  |

Date of issue/Date of revision

Inhalation

: Harmful if inhaled.

## **SECTION 4: First aid measures**

| Skin contact                | : Causes skin irritation.  |
|-----------------------------|--|
| Ingestion                   | : No known significant effects or critical hazards.  |
| <u>Over-exposure signs/</u> | /symptoms  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                  | <ul> <li>Adverse symptoms may include the following:<br/>reduced foetal weight<br/>increase in foetal deaths<br/>skeletal malformations</li> </ul>     |
| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
| Ingestion                   | <ul> <li>Adverse symptoms may include the following:<br/>reduced foetal weight<br/>increase in foetal deaths<br/>skeletal malformations</li> </ul>     |

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
|---------------------|---|
| Specific treatments | : No specific treatment.  |

## SECTION 5: Firefighting measures

| 5.1 Extinguishing media                           |   |   |
|---|---|---|
| Suitable extinguishing media                      | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |   |
| Unsuitable extinguishing media                    | Do not use water jet.   |   |
| 5.2 Special hazards arising                       | m the substance or mixture  |   |
| Hazards from the substance or mixture             | <ul> <li>Flammable liquid and vapour. In a fire or if heated, a pressure increase will occ<br/>and the container may burst, with the risk of a subsequent explosion. Runoff to<br/>sewer may create fire or explosion hazard.</li> </ul>  |   |
| Hazardous thermal decomposition products          | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |   |
| 5.3 Advice for firefighters                       |   |   |
| Special protective actions for fire-fighters      | Promptly isolate the scene by removing all persons from the vicinity of the incide<br>there is a fire. No action shall be taken involving any personal risk or without<br>suitable training. Move containers from fire area if this can be done without risk<br>Use water spray to keep fire-exposed containers cool.   |   |
| Special protective<br>equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained<br>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br>mode. Clothing for fire-fighters (including helmets, protective boots and gloves)<br>conforming to European standard EN 469 will provide a basic level of protection<br>chemical incidents. | ) |
|   |   |   |

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | ote | ctive equipment and emergency procedures   |
|---------------------------------|-----|--|
| For non-emergency<br>personnel  | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders        | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and material for    | со  | ntainment and cleaning up  |
| Small spill                     | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | :   | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                       | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in<br>eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Use only<br>with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|---|--|
| Advice on general<br>occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

## 7.2 Conditions for safe storage, including any incompatibilities

## **SECTION 7: Handling and storage**

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### Seveso Directive - Reporting thresholds (in tonnes)

#### Danger criteria

|   | Notification and MAPP threshold | Safety report threshold |
|---|---------------------------------|-------------------------|
| P5c: Flammable liquids 2 and 3 not falling under P5a or P5b | 5000                            | 50000                   |
| C6: Flammable (R10)   | 5000                            | 50000                   |

#### 7.3 Specific end use(s)

| Recommendations                      | : Not available. |
|--------------------------------------|------------------|
| Industrial sector specific solutions | : Not available. |

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name  | Exposure limit values  |
|--|--|

|                         | Marine water          | ≥1 mg/l                                  | -             |
|                         | Fresh water sediment  | ≥1000 mg/l                               | -             |
|                         | Marine water sediment | ≥100 mg/l                                | -             |
|                         | Soil                  | 100 mg/l                                 | -             |
|                         | Sewage Treatment      | ≥100 mg/l                                | -             |
|                         | Plant                 | L Č                                      |               |

| 8.2 Exposure controls               |     |   |
|-------------------------------------|-----|---|
| Appropriate engineering<br>controls | :   | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.                      |
| Individual protection measu         | res |   |
| Hygiene measures                    | :   | Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location. |
| Eye/face protection                 | :   | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                     |     |   |

## **SECTION 8: Exposure controls/personal protection**

| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|---------------------------------|--|
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.   |
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.   |

## **SECTION 9: Physical and chemical properties**

## **SECTION 9: Physical and chemical properties**

| Oxidising properties      | : Not available. |
|---------------------------|------------------|
| VOC content (% by weight) | : 25%            |

### 9.2 Other information

No additional information.

| SECTION 10: Stability and reactivity       |   |  |  |
|--|---|--|--|
| 10.1 Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.  |  |  |
| 10.2 Chemical stability                    | : The product is stable.  |  |  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |  |  |
| 10.4 Conditions to avoid                   | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |  |  |
| 10.5 Incompatible materials                | : Reactive or incompatible with the following materials:<br>oxidizing materials   |  |  |
| 10.6 Hazardous<br>decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |  |  |

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

#### Acute toxicity

| Product/ingredient name      | Result                          | Species | Dose                    | Exposure |
|------------------------------|---------------------------------|---------|-------------------------|----------|
| styrene                      | LC50 Inhalation Gas.            | Rat     | 2770 ppm                | 4 hours  |
|                              | LC50 Inhalation Vapour          | Rat     | 11800 mg/m <sup>3</sup> | 4 hours  |
|                              | LD50 Dermal                     | Rat     | >2000 mg/kg             | -        |
|                              | LD50 Oral                       | Rat     | 2650 mg/kg              | -        |
| titanium dioxide             | LC50 Inhalation Dusts and mists | Rat     | >6.8 mg/l               | 4 hours  |
|                              | LD50 Oral                       | Rat     | >5000 mg/kg             | -        |
| cobalt bis(2-ethylhexanoate) | LD50 Dermal                     | Rabbit  | >5 g/kg                 | -        |
|                              | LD50 Oral                       | Rat     | >2000 mg/kg             | -        |

**Conclusion/Summary** : Not available.

Acute toxicity estimates

| Route | ATE value                |  |
|-------|--------------------------|--|
|       | 9151.7 ppm<br>38.99 mg/l |  |

#### Irritation/Corrosion

| Product/ingredient name | Result                   | Species | Score | Exposure                   | Observation |
|-------------------------|--------------------------|---------|-------|----------------------------|-------------|
| styrene                 | Eyes - Mild irritant     | Human   | -     | 50 parts per million       | -           |
|                         | Eyes - Moderate irritant | Rabbit  | -     | 24 hours 100<br>milligrams | -           |
|                         | Eyes - Severe irritant   | Rabbit  | -     | 100<br>milligrams          | -           |

## SECTION 12: Ecological information

12.6 Other adverse effects : No known significant effects or critical hazards.

## SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

| Product             |  |
|---------------------|--|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste     | : The classification of the product may meet the criteria for a hazardous waste.   |
| Packaging           |  |
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.   |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.          |

## **SECTION 14: Transport information**
